

Illuminating Design

The warmth, sensuality and brilliance of a luminous ray are simply a magnet for the spirits. We just can't help ourselves. We are naturally attracted to light.

And living in a city like Vancouver, where light is a seasonally treasured commodity, puts added emphasis on brightening each day.

Lighting designers continue to redefine fixtures in ways that would make Thomas Edison shriek with excitement.

Ethereal shapes, tactile materials and vibrant colours are redefining icons like the chandelier and our way of looking at traditional light sources. Now lighting your home, office or outdoor space is an infinite switch of brilliant possibilities.
