

Green Thumb Office

"Study nature, love nature, stay close to nature. It will never fail you."
Frank Lloyd Wright

Growing your own salad bar in the office could be a corporate recipe for freshly tossed client lunches and a chance for your people to toss the styro in favour of seasonal and sustainable cuisine.

Check out Duende Design's eco storage unit for live freshwater fish combined with a symbiotic mini vegetable patch.

The philosophy of eating seasonal foods from just down the road has just gotten a lot closer to home. An all grass bench designed by Mindscape in Japan could double as a picnic escape for frazzled foodies or a garden of delights.

Vertical gardens and building envelopes in grass are sprouting up everywhere and the 'blanket effect' is hugging the heating and cooling bills with big savings.
