

## Leather Under Foot

You can wear it, lie on it, sit on it, travel with it, and now you can walk on it. Leather tiles are under foot and taking haute couture fashion leather from the catwalk directly home or to the office.

With hip-hop vitality or classic vintage styling leathers are adding luxury, luster, and exciting new possibilities for interiors.

Crimson Rattlesnake on your wall. Parchment Python under foot. Or a leather floor you design inspired by the monogram splendour of a Vuitton travel trunk; the possibilities are as exciting as shopping for new shoes in Milan.

A legacy of leather craftsmanship now comes home. Low maintenance, just a buff up here and there. Leather is a spectacular use of material in creating a harmonized sound environment. Customization possibilities that extend colour and texture to corporate logos and banding.

Breathe luxury into an interior with your personal patina.
