

## Rock of Ages

The rocking chair has always been a metaphor for comfort, simplicity and contentment. Images of grandma, babies, knitting needles and the smell of a good pipe come to mind. Style, however, does not.

Turbulent times have sent metropolitan comfort seekers jumping into the nurturing touchstone of a rocker but not running from chic design.

The Pastil bubble chair hugs your body with a rock in any direction. This biomorphic design brings organic comforts to a futuristic high. Want to live in a bubble and forget the world outside, take a seat.

Rock with a loved one and swap the arts section for the business section of the newspaper without missing a beat of your rhythmic escape. The tete-a-tete rocker is a perfect way to sit and reflect on why two heads are better than one.

New mothers, there's no need to go into premature labor finding a stylish rocker. Montreal Designer Patrick Messier created "the mamma rocking chair" for his expecting partner. Don't we all wish we looked this good after giving birth to an amazing design like this one. Of course, you'd don't need to cry like a baby to enjoy this rocker.
